Join the Domain from the workstation

To connect to your domain:

* In computer properties go to "Change setting"

* Under Computer Name Tab go to "Change"

* You will see in Member of: 'your' Workgroup, change it to the domain your profile is on.

* In the domain box type in your server's name (example: lab2.edu) and click OK.

* Type in the Administrators account name and password for the domain server.

* Then it will ask you to restart.

* After restart Press and hold CTRL + ALT + DEL.

* Type your account name and password that you made on the domain.
